Afin de monter les dossiers ACCESS sur le serveur MSDE, vous devez copier les fichiers composant vos dossiers dans le répertoire d'installation de Popsy d'une machine en local (ou du serveur).

U neemt de bestanden XXXSOC.MDB, XXX staat voor de nummer van het dossier.

<u>Voorbeeld</u> :

Indien uw dossier de nummer 001 in de lijst van de dossiers van Popsy is, dan moet u het bestand 001SOC.MBD kopieren naar de map van Popsy.

Eenmaal dit gedaan is, gaat u in Popsy naar « Bestand – Import – Volledig »

Verander « Database bestanden » (via de knop 🔜) en plaats dit op « Systemat Software Databases »
